

Men's Pair (M2-)

Match-up: Drew Ginn & James Tomkins (AUS) vs. Martin Sinkovic & Valent Sinkovic (CRO)

These two crews have a host of medals between them, making this an extraordinarily tough one to call. Tomkins and Ginn hold two World Rowing Championship gold medals, from 1999 and 2003. They went on in 2004 to grab the coveted Olympic gold medal in the boat class. But that's not all, the pair had other sweep rowing successes. Tomkins won two Olympic gold medals in the men's four from the 1992 and 1996 Olympic Games, while Ginn also had 1996 gold from the men's four and then went on to win gold at the 2008 Olympic Games together with Duncan Grant. If anything is for sure, these two can sweep.

The Australians are lining up against the all-star Sinkovic brothers. The Sinkovic's are synonymous with winning in today's rowing world. The brothers have two World Championship titles in the men's pair from 2018 and 2019, as well as a 2017 silver medal. The Sinkovics, however, have much more rowing history. They only switched to the pair in 2017, after taking Olympic gold in the men's double sculls and then prior to that having World Championship success in the men's quadruple sculls.

Who do you think would win this match-up?
